Art Unit: 3681

Claims Allowed

Claims 1-14 are allowed. The claims are allowable because the prior art of record does not anticipate nor render obvious the claimed invention of a torque-down control device and method for reducing the torque of an internal combustion engine driving a transmission during a downshift thereof such that the ignition timing is delayed, wherein the device and method includes the features of either a guard portion which restricts a predetermined delay amount of an ignition timing using a guard value when the timing is delayed by a predetermined amount and a learning portion which corrects the guard value based upon a change in rotational speed of a member whose speed changes during down shifting, or a feedback control portion which performs feedback control of a predetermined delay based upon a change in rotational speed of a member whose speed changes during a down shift.

Prior Art Discussed

The examiner has considered the reference cited by applicant in his Information Disclosure Statement filed September 8, 2003. The reference is in a foreign language and therefore cannot be completely considered.

The references cited by the examiner are deemed pertinent to applicant's disclosure. Iwatsuki '669 shows an ignition control for an engine during shifting, but does not show a guard value nor a feedback control as recited in the claims. Abe '591 shows another ignition control for an engine during gear shifting, but does not show a guard value, and does not show a feedback control that is responsive to a change in rotational speed of a member whose speed changes during a gearshift. Sankpal '005 shows an ignition delay during gear shifting but does not show any feedback controller for the delay or a guard value.

Art Unit: 3681

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 703-308-0830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
